Subject: BPA should promote renewables and wild salmon restoration

Administrator Steve Wright  
PO Box 12999  
Portland, OR 97208

Dear Administrator Steve Wright,

Renewable energy is the way to go. We need to look ahead, not keep using resources that are insufficient and harm our environment.

Also, I think the 4 lower Snake River dams should be removed.

Please, do the right thing for the species who cannot adapt as readily to changes in their environment as we can. Humans can go out and find new jobs. Salmon can't go out and find new homes.

Thank you,

Mary Davis

Sincerely,

Mary Davis
