Subject: Adopt the clean energy proposal-PLEASE!

Dear Mr, Wright,

This letter is intended to strongly urge you and BPA to adopt the clean energy proposal.

BPA has an opportunity to become a leader in developing an energy plan that will be pro business, protect workers, as well as consumers and the environment. All this while providing affordable and cost effective energy. The Clean Energy Proposal will protect public health, provides price stability, and is the environmentally responsible way to go.

It will reduce fossil fuel consumption-thus reducing emissions, contributing to cleaner air and water. Additionally, it reduces oil consumption and benefits endangered species by protecting their habitat.

BPA has an opportunity to largely contribute to these issues, while enriching rural economies by creating additional jobs. Mr. Wright, please do the right thing, make the adoption of the clean energy proposal a goal of yours, and help in fostering its adoption. Thank you in advance, your support on this is appreciated.

Sincerely,

Kurt Geist
