10/2/02

RECEIVED BY BPA PUBLIC INVOLVEMENT LOG#: RD-0236
RECEIPT DATE: SEP 08 2002

DEAR Administrator Wright,

I am writing you in regards to the BPA's development of its 2006-2026 contracts with its customers. I strongly urge you to choose a proposal that diversifies its energy resources. This proposal should include renewable energy sources such as wind and solar. The plan should also focus on conservation goals. This will lead to a cleaner energy future and the removal of dams on the lower Snake River giving wild salmon a chance.

By diversifying the energy resources and implementing conservation programs, The Bonneville Power Administration can reduce its dependence on hydropower. This reduction would allow the BPA to remove these dams on the Snake River. This would help bring back wild salmon runs, restoring miles of critical spawning and migratory habitat.

This would help communities that depend on salmon runs. It would increase local revenues through commercial and sports fishing. It would also restore a vital link in the environment that being the salmon.

So please choose a plan that diversifies the energy resources and implements conservation programs.

Sincerely,

ROBERT GRESKY
