Subject: Save The Dams

Attn: Steve Wright

In my working career, of 40 years, I have been exposed to Hydro power and, also, worked with pipeline power to move natural gas to California. From my experience, it is far more cost effective to use Hydro power. Hydro generation cost less and is very reliable, AND you are not burning up our natural resources(natural gas).

Removal of the Dams would cause economic chaos to Southeastern Washington.

Leave the Dams in place and continue working with the National Marine

Fisheries to improve the fish runs.

I DO NOT support the adoption of the PUBLIC INTEREST PROPOSAL!

Sincerely, H.K. Hamann
