--

Dear Mr. Wright,

Long-term contracts to supply power to North  
critical to the economy of the entire region. The up  
regarding power for the aluminum industries will af  
not only those families whose jobs are at risk. When  
closes, all suppliers, service industries and subseque  
suffer as well.

Lack of sufficient affordable power has already contributed to  
the closure/reduction of major plants in Spokane and Addy,  
Washington as well as in Troutdale Oregon. These plants were vital  
economic assets to their communities and are critically missed.

We must encourage production of power in order to keep  
industries, which in turn will keep demand up. The Satsop plant  
which was to produce gas-powered energy has closed due to low  
prices. By closing power- user industries, we are also hurting energy  
producing companies. It is very important to keep user-contracts  
and producers all going at full speed.

Please use your influence to keep industries profitable enough  
to stay in our state and to help power producers deliver supplies of  
power to fill all needs. Our economy and families depend on it!

Thank you for your work.

Sincerely,  
*Jack W. Nielsen*
