Dear Sirs

I support the use of renewables - wind, solar, geothermal, and ground heat exchange systems. I also think BPA should get involved with fuel cell technology. Ballard Power in BC leads the field and BPA should partner with them in making fuel cell units more cheaply available to houses and industry.

I support 20% renewable usage by 2020.

I also support no barging of salmon & steelhead smolts and support water spill during spring migration.

Stephen M Pauley MD
