Subject: Clean Energy Proposal

Stephen Wright, Administrator and Chief Executive Officer

I urge you to seriously consider and adopt the Clean Energy Proposal. The local benefits are obvious. I believe such action also will have world wide

implications. The more we can use our own resources and protect our environment to develop energy sources the less dependent we are on other nations and the less likely we are to support military efforts to secure those resources. We need to be better neighbors - let's start in our own back yard.

Support the Clean Energy Proposal.

Thank you.

Coleen Renee
